

# iPhone parts serialisation

## MOST COMMON REPAIRS

# iPhone batteries and back covers available from Mobileparts.shop

- 

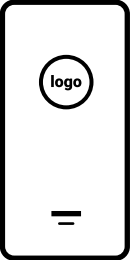

**Standard battery**

Our standard battery is a reliable choice for everyday use. It provides a seamless replacement for the original iPhone battery, guaranteeing optimal performance and a long lifespan.
  - 

**High-capacity battery**

Our high-capacity battery is ideal for more demanding users. With up to 25% more capacity, it delivers a significantly longer battery life. Perfect for travellers, gamers and users who are always on the move
  - 

**Battery without BMS**

BMS (Battery Management System): A battery without IC allows the old battery's IC to be transferred easily. This prevents the iPhone's 'unknown part' notification.
